

1. ETTC'03 (10-12 June 2003, Toulouse, France)

(See attachments A1 & A2)

Following the ETTC Scientific Committee meeting held on 19 February this year, the ETTC conference (10-12 June) is taking shape (see A1 for draft Conference Schedule). The list of papers to be presented has also been finalised (see A2 for draft Conference Programme).

NB : A half-day has been set aside on Tuesday, 11 June (afternoon) for the ICTS General Meeting.

2. Point 2.12 of the Draft Agenda of WRC'07

Call for Point 2.12 Contributions !

- Several responses have reached us with regard to contributions from various National Radio-frequency Agencies in favour of maintaining this point in the final WRC'07 agenda as well as proposals to reformulate the text so that frequency needs are met more efficiently.
- We think that this is the occasion on which to better delineate the actual field of application of "aeronautical telemetry". We therefore suggest that members draft a brief memo outlining what they understand by the strict definition of RR (Radio Regulations) of ITU-R with regard to their requirements. All replies will be published in NL#16.

3. Next CPG Meeting of CEPT (European Conference of Postal and Telecommunications Administrations)

You are reminded that the next CPG (Conference Preparatory Group) of CEPT will be held in **Madeira on 28 April – 2 May 2003**.

ICTS-RELATED EVENTS YEARPLANNER
