

1. Report of the ICTS Fall Meeting in Las Vegas, 21 October 2003
(See Attachment A1)

See A1 for a full report of this ICTS meeting.

2. WRC'07 Agenda

Now that the subject of telemetry has been well and truly taken on board with Point 1.5 in the WRC'07 Agenda, we must not waste time in defining the contributions to be transmitted to our respective National Agencies. A suggestion for the main topics could be as follows :

- Clarification of the telemetry terms of reference in order that the definition be proposed to the ITU,
- Definition of the foreseeable needs for the civil and military fields of application,
- Proposal of some solutions with regard to the best adapted but already occupied wavebands likely to lead to an effective share of these wavebands.

3. SG8 Meeting in Geneva

The first meeting since the WRC'2000 of the ITU-R's SG8 in which the Point 1.5 is due to be discussed will be held on **25 November – 2 December 2003 in Geneva**.

The following meeting will be held on **8- 16 September 2004**.

"Letters to the Editor"

ITEA and the Royal Aeronautical Society are sponsoring their 5th T&E international aerospace forum to be held in London, UK on 13- 15 July 2004.

The Call for papers (see www.itea.org) includes the topic of frequency encroachment (Session 1).

Given the high profile of this event in the wider T&E community, it is hoped that either the ICTS Chair or Vice- Chair, Tim Chalfant or Viv Crouch, in view of their long-standing association with ITEA, could be persuaded to present an updated "ICTS Background/Strategy" paper at this conference.
