Eighth Biennial ERTS^2 Conference Taking Place January 27-29, 2016, in Toulouse, France

Embedded Real-Time Software and Systems Conference showcases technologies for safety-critical markets; features keynotes from Safran Electronics R&T VP François Neumann and U.C. Berkeley Professor Edward Lee

Toulouse, France — September 17, 2015 — The next ERTS² Conference, a unique international cross-sector event focused on embedded software and systems, will feature François Neumann, Vice-president R&T of SAFRAN Electronics, and Edward Lee, Professor of Electrical Engineering and Computer Sciences at the University of California, Berkeley, as its keynote speakers. Taking place in Toulouse, France, during January 27 -29, 2016, this eighth ERTS^2 conference offers an impressive mix of research and industrial presentations from the embedded software and systems domain

The conference is sponsored by a number of multinational companies including AdaCore, Airbus and QA Systems, and attracts attendees from leading corporations, government agencies, and universities that focus on secure technologies for safety-critical markets such as automotive and aerospace. It is co-chaired by Joseph Sifakis, Professor at Swiss Federal Institute of Technology (Lausanne) and Türing Award 2004, and Kjeld Hjortnaes, European Space Agency.

The ERTS^2 program includes scientific papers on advanced technology solutions for the transportation, aeronautics, automotive, railway, subway and marine industries. Sessions will be led by distinguished academics and leading corporate executives and will highlight the latest technological advances in satellite and space exploration, energy, telecommunications and wireless connectivity, e-healthcare, home automation, defense, and industrial control.

Complementing the technical sessions, more than 50 exhibitors from tools providers and SMEs specialized in embedded systems development and integration will demonstrate or explain a wide-range of innovative products and services

Past ERTS² conferences have included more than 100 presentations, 500 participants, and 50 exhibitors, with more than 2000 B2B meetings.

To register as an attendee or to exhibit at the ERTS² 2016 conference, please visit http://www.erts2016.org/registration.html. Early bird special pricing ends on November 15, 2015.

About ERTS²

The ERTS² conference is a unique European cross-sector event on Embedded Real-Time Software and Systems, a forum for top-level scientific interchange with representatives from universities, research centers, government agencies, and industry The conference is organized by 3AF Midi-Pyrenées (French sister association of AIAA), SEE, the French Society for Electricity Electronics and Information and Communication Technologies (sister association of IEEE), and SIA, the French Society of Automotive Engineers (sister association of SAE).
